Status of Claims

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-21, 23, 26 and 27 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Schulhof et al., U.S. Patent No. 5,572,442.

As per claims 1-21, 23, 26 and 27, Schulhof et al. teach a method for distributing music comprising:

- blanket transmitting, at faster than real time speeds, simultaneously a plurality of music selections to a plurality of customer households for receipt on a plurality of inputs (figures 1 and 5-7; column 5, lines 50-60)
- a first interface enabling at least one customer to preselect and record transmitted music selections in a read/write storage medium (e.g. read/write CDs, magneto-optical disks, digital tape) (abstract;

figures 1, 4, and 6; column 5, lines 6-20 and 50-67; column 7, lines 5-53; column 8, lines 60-67; column 12, lines 54-67)

- a second interface permitting the customer to select recorded music for unrestricted playback (figures 1, 4, and 6; column/line 4/48-5/20; column 5, lines 50-67; column 7, lines 5-53; column 9, lines 20-26)
- communicating unrestricted playback selection information to a central controller, via satellite, cable, ... etc., and billing the customer for the selected unrestricted playback (column/line 4/48-5/20; column 6, lines 24-52; column/line 7/54-8/2; column 9, lines 20-26; column 10, lines 42-65)
- selection information that includes availability, scheduling and price data (column 5, lines 60-64; column 7, lines 27-33 and 45-53; column/line 7/61-8/4; column 9, lines 26-38)
- an interactive guide, via a display device, to allow users to make content selections, and select functions to playback and record content (abstract; figures 1-4, 6 and 7; column 7, lines 27-53; column/line 9/65-10/15; column/line 11/65-12/10; column 12, lines 54-67; column 13, lines 10-28; column 14, lines 18-26 and 39-55)
- receiving and decoding musical selections and storing decoded selections and associated information in a digital data storage

device for temporary storage (figures 2, 3 and 7; column 9, lines 26-38; column 12, lines 10-18 and 29-67)

- accessing the content over the internet link to a website or phone line connection (figure 1; column 7, lines 35-52)
- allowing users to access content one or more times on a no-charge basis prior to permanently selecting the content (column 9, lines 27-37)
- generating a permanent enabling code for inclusion with the permanent recorded music selections to enable unrestricted playback (column 9, lines 27-37)
- communicating with a broadcast satellite up-link facility, operating in the KU or other suitable frequency bands, via a central controller, and transmitting program/pricing information to the broadcast facility on a periodic basis (figures 5 and 7; column 6, lines 24-52)

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 22, 24, 25 and 28-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schulhof et al., U.S. Patent No. 5,572,442.

As per claims 22, 24, 25 and 28-30, Schuloff et al. teach a system for transmitting audio content to a plurality of users, where users can record and playback content using a plurality of interfaces, and are billed for using the content distribution service (figures 1 and 4-7; column/line 4/48-5/67; column 6, lines 24-34; column/line 7/54-8/2). Schuloff et al. do not specifically recite using DVD-RAM to record content. However, Schuloff et al. teach that digital, optical, magnetic or other high density, high capacity can be used. Therefore, it would have been obvious to one of ordinary skill to use DVD-RAM for portable storage (column 4, lines 55-67; column 8, lines 59-67; column 12, lines 54-64). Similarly it would have been obvious to one of ordinary skill to store a plurality of disks with content recorded thereon.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

- Lowell teaches an system for downloading content over the internet
- Logan et al. teach a system for automatically downloading content by using a preselected segment to identify the content to be downloaded and storing content in RAM
- Payton teaches content on demand

- Wolfe et al. teach music on demand from the internet
- Wiser et al. teach an online music distribution system
